Beyond Workplace Politics: Using Social and Emotional Competencies

Workplace politics encompasses the power and authority processes and behaviors that are at work in a particular workplace. It is how the links between people in the workplace work. There are workplace politics at play in every organization! Daniel Goleman, the co-founder of the Collaborative for Academic, Social, and Emotional Learning (CASEL) theorized the social aspect of behavior as a complement to the emotional. His definition expanded to: “Social and emotional intelligence involves understanding your feelings and behaviors, as well as those of others, and applying this knowledge to your interactions and relationships.” This one-day course will explore the social and emotional competencies and their role in working beyond workplace politics!
